SUMMARY

Full Stack Software Engineer with 3+ years of experience building scalable web and mobile applications using MERN, Next.js, and Flutter. Proven track record of architecting end-to-end solutions with real-time databases (Firestore, MongoDB), optimizing API performance by 45%, and delivering user-centric platforms handling 500+ concurrent users. Expert in backend system design, frontend interactivity, and workflow automation.

TECHNICAL SKILLS

- Backend Development:** Node.js, Express, REST APIs, GraphQL, PHP, Firebase, MongoDB, SQL
- Frontend & Mobile:** React, Next.js, JavaScript, TypeScript, Flutter, React Native, HTML/CSS, Fabric.js
- Cloud & DevOps:** Firestore, AWS, Docker, Git, CI/CD, Linux, Nginx
- Automation & Tools:** n8n, Zapier, Webhook Integration, Payment Gateways (Stripe), CRM Systems

EXPERIENCE

- Software Developer (Remote)** Nov 2025 – Present
Twodotzero Innovation Agency *Barcelona, Spain*
• Architected end-to-end backend admin systems and data interaction layers using **Firestore DB**, enabling real-time scalability for SME client platforms.
- AI Engineer** Feb 2025 – Oct 2025
DevMechanix *Islamabad, Pakistan*
• Automated marketing and support workflows using **n8n integration**, reducing manual operations by 35% while building RAG-based semantic search systems.
- Full Stack Engineer Intern** Jul 2023 – Sep 2023
IT Solera Pvt Ltd *Remote*
• Deployed ML-powered video platform with **MERN stack** backend integration, cutting API latency by 45% through optimized GPU utilization.
- Backend Database Developer Intern** Apr 2022 – Sep 2022
ROBX.AI *Remote*
• Optimized **SQL queries** and **REST APIs** for analytics platform, achieving 35% faster data access for 500+ active users.

PROJECTS

- Tickly - Seatmap & Event Management Platform** tickly-project.devmechanix.com
Full Stack Development *React, PHP, Fabric.js, MySQL*
• Built comprehensive event ticketing platform from scratch with interactive drag-and-drop seat designer using **React, PHP**, and **Fabric.js**.
• Engineered real-time canvas rendering optimized for large venues (1000+ seats), integrated payment gateway, and admin dashboard with analytics.
• Implemented RESTful API backend handling concurrent bookings with mutex locking, reducing double-booking incidents to zero.
- Houdini Tickets - Interactive Ticketing Platform** houdinitickets.com
Full Stack Development *Canvas API, Caching, Payment Integration*
• Developed real-time seatmap interface with **canvas-based interactivity**, supporting high concurrency with API caching and CDN optimization.
• Integrated Stripe payment processing and responsive UI handling 500+ simultaneous users during peak event sales.
- Dental Clinic Automation System** DevMechanix Internal Project
Workflow Automation *n8n, Chatbot, TTS, CRM Integration*
• Built end-to-end dental appointment automation using **n8n workflows**, integrating AI chatbot for client interaction, voice recording, and payment processing.
• Implemented **Text-to-Speech (TTS)** appointment reminders, CRM business logs, and automated follow-up sequences, reducing no-shows by 40%.

- Connected Google Calendar, Stripe payments, and WhatsApp notifications in unified workflow handling 200+ monthly appointments.

CRM Business Interaction System
Backend Automation

Client Project
n8n, Webhooks, Database Integration

- Architected automated CRM logging system capturing client interactions across multiple channels (email, chat, phone) using **n8n webhooks**.
- Built custom dashboards aggregating interaction data with real-time sync to PostgreSQL database, enabling sales team productivity tracking.

MERN Blog App
Full Stack Development

GitHub
MongoDB, Express, React, Node.js

- Developed full-featured blogging platform with JWT authentication, role-based access control (admin/user), and rich text editor integration.
- Implemented Redis caching layer reducing database queries by 60%, responsive UI, and admin analytics dashboard tracking user engagement.

Purrfect Assistant - AI Pet Health App
Mobile Development

GitHub
Flutter, Firebase, GPS

- Built cross-platform mobile app using **Flutter** with comprehensive **Firebase** integration (Authentication, Firestore, Cloud Messaging, Storage).
- Implemented AI breed detection, health tracking system, GPS-based vet locator, and push notification reminders for vaccinations.

EDUCATION

FAST NUCES
B.S. in Computer Science

Islamabad, Pakistan
Sept 2021 – May 2025

- Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering, Web Development
